INTRODUCTION

General set-up

From several sides we received the suggestion that the General Embryological Information Service should not be published annually because of the fact that only a part — about one third — of the subjects changes in the course of each year. One must, however, realize that the new subjects reflect the actual progress in this field of science and that they are of particular interest for international cooperation. A biennial appearance has moreover the disadvantage that addresses may gradually get out of date. For these reasons we insisted up till now on publishing the G.E.I.S. annually. When, however, the majority of contributors and subscribers has the feeling that a biennial appearance of the G.E.I.S. will actually fulfil their desires and does not markedly interfere with the usefulness of the G.E.I.S., we are willing to meet this general demand.

Since not only a survey of the current investigations but also other international activities of the Hubrecht Laboratory find expression in the G.E.I.S., activities which would actually be affected adversely by a biennial appearance, we have the intention to publish a supplement to the preceding issue in the interjacent years. This supplement will contain the general announcements of the "Institut International d'Embryologie" and the Hubrecht Laboratory, the "Supply and Demand" Service for laboratory animals and the reviews of new textbooks in the field of embryology and in related fields. Thus we hope that these international activities of the Hubrecht Laboratory will develop normally. We have the pleasure to announce you that we hope to be able to offer this supplement free of charge to all the regular subscribers, the subscription fees for the G.E.I.S. being paid biennially with the appearance of each new issue.

Consequently we intend to publish the sixth issue not until 1955. We should, however, appreciate it very much to have your personal opinion about the question of an annual or biennial appearance of the G.E.I.S. We, therefore, request you to fill in the attached slip for inquiry and send it us at your earliest convenience, so that we might still be able to publish the next issue in 1954, in case the majority of contributors and subscribers should express themselves in favour of an annual publication. We thank you in advance for your personal cooperation.

Will you, please, keep us informed about changes in addresses and academic positions, so that no loss of addresses will occur in the rather long period between the appearance of two successive issues of the G.E.I.S.

The sending-in of data

We ask your attention for the following points:

1. We urgently request you to return forms before August 1st. Data received after November 1st cannot be included in the current issue.

2. A number of collaborators still send us bibliographical data about their recent publications. May we remind those that we only record current or planned investigations?
3. Collaborators working on the same subject are kindly requested to send in separate forms for each of them personally.

Subscriptions

The subscription-fee remains H.fl. 22.75, which corresponds to U.S. \$ 6.—. We want to bring to your special attention that subscriptions are supposed to run until further notice.

We again ask your collaboration to reach those workers in the field of embryology (to be taken in its widest sense) who are not yet included in this issue. Will you please draw their attention to this Service and send us their addresses?

General remarks

The new activity of the Hubrecht Laboratory in the form of the "Supply and Demand" Service for laboratory animals (see page 156) has met with considerable interest and has developed satisfactorily. We are now able to give you data from a dozen biological supply houses and from nearly two dozens of individual institutes. We hope that this service will markedly facilitate the acquisition of living material for scientific research.

Since this service will be published annually we request you to send us supplementary data for 1954 in the course of the first half of the year. You will find a form folded in between the first pages of the chapter concerned (page 156).

The last chapter containing reviews of new textbooks and of revised editions of older ones has been markedly extended, so that we expect that soon a more or less complete survey of new books in the field of embryology and in related fields may be found in this chapter. We decided that this chapter should at any rate be published annually in order to guarantee actuality of the reviews.

LIST OF NAMES AND ADDRESSES

with Subjects in Preparation

(alphabetical order)

- ABELOOS, M. Prof. — Lab. de Zool. génér. de la Fac. des Sci. et Stat. marine d'Endoume (Marseille), Place Victor Hugo, MARSEILLE, France
a. Régénération. (*Polychaeta*)
- ABERCROMBIE, M. M.A., B.Sc. — Dept of Embryol., Univ. Coll. London, Gower St, LONDON W.C. 1, England (U.K.)
a. Transplantation experiments on blastoderm tissue culture. *Gallus domesticus* (Aves)
b. Cinematographic study of cell relations in tissue culture. *Gallus domesticus* (Aves) (in collaboration with Miss J. E. M. HEAYSMAN)
c. Regeneration and induced proliferation in the adult. *Rattus norvegicus* (Rodentia) (in collaboration with Miss J. E. SANTLER)
- ADAMS, Miss E. C. B.A. — Harvard Univ. Med. School, Dept of Pathol., 25 Shattuck St, BOSTON 15, Mass., U.S.A.
a. Development of ova from fertilization to 14-days (first missed menstrual period). *Homo* (Primates) (in collaboration with A. T. HERTIG, J. ROCK and W. J. MULLIGAN)
- ADAMSTONE, F. B. Ph.D., Prof. — Dept of Zool., Univ. of Illinois, URBANA, Ill., U.S.A.
a. Development of the amnion. *Gallus domesticus* (Aves)
- ADELMANN, H. B. F.I.I.E., Dr, Prof. — Dept of Zool., Cornell Univ., ITHACA, N.Y., U.S.A.
(no data received)
- AHSAN-ul-ISLAM M.Sc. — Dept of Embryol., Univ. Coll. London, Gower St, LONDON W.C. 1, England (U.K.)
a. Experiments on regional determination. *Gallus domesticus* (Aves)
- ÅKESSÖN, B. Fil. mag. — Embryol. Dept, Zool. Inst. of the Univ. of Lund, LUND, Sweden
a. Development of the larva. (*Sipunculidae*)
- ALBRIGHT, J. F. — Dept of Zool., Indiana Univ., BLOOMINGTON, Ind., U.S.A.
a. Immunochemical and biochemical analysis of the development of the anterior pituitary. *Gallus gallus* (Aves)
b. Analysis of the effects of adult or late embryonic tissue transplants on homologous tissues of the host embryo. Effects on synthesis of desoxyribonucleic acid and proteins. *Gallus gallus* (Aves) (in collaboration with J. D. EBERT)
- ALDEN, R. H. Ph.D., Prof. — Univ. of Tennessee, Fac. of Biol. Sci., Med. Units Div., MEMPHIS 3, Tenn., U.S.A.
a. Study of egg transport and implantation; early development of trophoblast; embryo-maternal relationships during nidation. *Mus* (Rodentia)
- ALLANSON, Miss M. Ph.D. — Dept of Zool., King's Coll., Strand, LONDON, W.C. 2, England (U.K.)
(no data received on Nov. 1st, 1953)

- ALTSCHUL, R. M.D., Prof. — Dept of Anat., Univ. of Saskatchewan, SASKATOON, Canada
a. Tissue culture. Influence of biostimulators on cell growth.
- AMANUMA, A. M.Sc. — Lab. Exper. Embryol., Inst. of Polytechn., Osaka City Univ., Minami-Ogimati, Kita-ku, OSAKA, Japan
a. The effect of X-ray irradiation upon the development of the gonad. *Triturus pyrrhogaster* (*Urodela*)
- AMPRINO, R. M. M.D., Prof. — Inst. of human Anat., Corso Massimo d'Azeglio 52, TORINO, Italy
a. Qualitative and quantitative development of cornea and sclera following removal of parts of the eye anlage. *Gallus domesticus* (*Aves*)
b. Regulative and regenerative capacities of the primary optic vesicle. *Gallus domesticus* (*Aves*)
c. Effects of the removal of the anlage of the pineal body on the development. *Gallus domesticus* (*Aves*)
- ANCEL, P. A. F.I.I.E., Dr, Prof. (Honor., Emer.) — Inst. de Biol. physico-chimique, Fac. de Méd., 13 Rue Pierre Curie, PARIS Ve, France — 61 Avenue Niel, PARIS, France
(no data received on Nov. 1st, 1953)
- ANDERS, G. Dr Phil. — Zool.-vergl. Anat. Inst., Naturwiss. Fak., Univ. Zürich, Künstlergasse 16, ZÜRICH 6, Schweiz
(no data received over some years)
- ANDRES, G. Dr — Max-Planck-Inst. für Biologie, Spemannstr. 34, TÜBINGEN, Württemberg, Deutschland
(no data received over some years)
- ANDREW, Miss A. B.Sc.Hons. — Dept of Zool., Univ. of the Witwatersrand, Milner Park, JOHANNESBURG, South Africa
a. Early embryology. *Tatera brantsi* (*Rodentia*)
- ANTON, H.-J. Dr — Zool. Inst. der Univ. Köln, Kerpenerstr. 13, KÖLN-LINDENTHAL, Deutschland
a. Die Regenerationsleistungen heteroplastischer Keimblattchimären. *Triturus vulgaris, cristatus, alpestris* (*Urodela*)
b. Unverträglichkeitsreaktionen bei heteroplastischen Transplantationen. *Triturus vulgaris, cristatus, alpestris* (*Urodela*)
- AOTO, T. Rigakushi (M.S.) — Zool. Inst., Fac. of Sci., Hokkaido Univ., North 8, West 5, SAPPORO, Japan
(no data received on Nov. 1st, 1953)
- ARIËNS KAPPERS, J. M.D., Prof. — Anat.-Embryol. Lab. der Rijks Univ., Oostsingel 69, GRONINGEN, Holland
a. The development of the brain. *Xenopus laevis* (*Anura*) (Normal Table)
- ARMSTRONG, P. B. B.S., M.D., Prof. — Dept of Anat., School of Med., State Univ. of New York, SYRACUSE 10, N.Y., U.S.A.
a. Function in the developing liver. *Ambystoma punctatum* (*Urodela*) and *Amiurus nebulosus* (*Teleosteii*)
- AROSIO, G. Dott. Sci. Biol. — Ist. di Zool. e Anat. Comp., Univ. di Milano, Via Celoria 10, MILANO, Italia
a. Myosin. (*Vertebrata*)
b. Immunological development. (*Amphibia and Mammalia*)
- ASAYAMA, S. M.Sc., Dr.Sc., Prof. — Lab. Exper. Embryol., Inst. of Polytechn., Osaka City Univ., Minami-Ogimati, Kita-ku, OSAKA, Japan

- a. Effects of various proteinic and sterolic hormones upon the sex-differentiation of the gonad. *Hynobius nebulosus* (Schlegel) (*Uro dela*)
 - b. Histochemical study of gonadogenesis. *Triturus pyrrhogaster* (Boie) and *Hynobius nebulosus* (Schlegel) (*Uro dela*)
- ASSENMACHER, I. Dr en Méd. — Inst. d'Embryol., Fac. de Méd., 1 Place de l'Hôpital, STRASBOURG, France
- a. Development of gonads, hypophysis and hypothalamus. *Gallus*, *Anas* and *Columba* (*Aves*) (in collaboration with J. BENOIT)
- ATLAS, M. B.S., A.M., Ph.D., Assoc. Prof. — Dept of Biol., Yeshiva Univ., 186th St and Amsterdam Ave, NEW YORK 33, N.Y., U.S.A.
(no data received over some years)
- ATTARDO, Miss C. Dr — Ist. di Zool., Via Archirafi 18, PALERMO, Italia
- a. Xenoplastic gonad transplants. (*Amphibia*)
- AUBRY, Miss R. Lic. ès Sci. — Inst. de Zool., Lab. de Biol. génér., Fac. des Sci. de Strasbourg, 12 Rue de l'Université, STRASBOURG, France
- a. Etude de la lignée germinale. (*Amphibia*)
 - b. Etude de l'hermaphroditisme. (*Gastropoda*)
- AUSTIN, C. R. M.Sc., B.V.Sc. — Div. of Animal Health and Production, C.S.I.R.O., McMaster Animal Health Lab., Parramatta Rd., Glebe, SYDNEY, N.S.W., Australia
- a. Investigation of fertilization and segmentation by histochemical methods and with phase-contrast microscopy. *Rattus rattus* and *Mus musculus* (*Rodentia*) (in collaboration with A. W. H. BRADEN)
 - b. Chemical and physical factors involved in the sperm penetration of the zona pellucida. *Rattus rattus* (*Rodentia*) and *Oryctolagus cuniculus* (*Lagomorpha*) (in collaboration with A. W. H. BRADEN)
 - c. Distribution and passage of sperms through female tract; significance of numbers. *Rattus rattus* (*Rodentia*), *Oryctolagus cuniculus* (*Lagomorpha*) and *Ovis aries* (*Artiodactyla*) (in collaboration with A. W. H. BRADEN)
- AVEL, M. F.I.I.E., Dr. Prof. — Fac. des Sci. de Bordeaux, 40 Rue Lamartine, TALENCE (Gironde), France
- AVIS, F. R. A. B. Brown Univ. — Roscoe B. Jackson Memorial Lab., BAR HARBOR, Me. U.S.A. (no data received over some years)
- AXIANAS, L. — Ist. di Zool. e Anat. Comp. dell'Univ., Via A. Volta 4, PISA, Italia
- a. Development of the gonads. *Rana graeca* (*Anura*)
- BACCI, G. Dr, Prof. — Zool. Dept, Zool. Station, NAPLES, Italy
(no data received)
- BÄCKSTRÖM, S. A. A. — Wenner-Grens Inst. for experimental Biology, Norrtullsgatan 16, STOCKHOLM Va., Sweden
(no data received on Nov. 1st, 1953)
- BAFFONI, G. M. Dr — Lab. di Istol. ed Embriol. della Fac. di Sci., Univ. di Roma, Via A. Borelli 50, ROMA, Italia
- a. Growth and differentiation of the nervous cell. (*Amphibia* and *Insecta*)
 - b. Action of hormones on gametogenesis. (*Amphibia*)
- BAGIŃSKI, S. M.D. — Inst. of Histol. & Embryol., Acad. of Med., Narutowicza 60, ŁODZ, Poland
- a. Influence of sulphonamides on the size of embryos. *Gallus* (*Aves*)

- BAIOCCHI, O. — Lab. d'Hormonol. et de Cytol., Ecole Pratique des Hautes Etudes, Hôpital Broca, 111 Rue L. M. Nordmann, PARIS XIII^e, France
- a. Décoloration du dichlorophenol indophenol (DPIP) par l'ovocyte. Etude par micro-injection quantitative. *Mus musculus (Rodentia)*
(en collaboration avec R. MORICARD et Miss M. M. C. S. GOTHIÉ)
- BAKER, R. C. B.A., M.Sc., Ph.D., Prof. — Dept of Anat., Ohio State Univ., COLUMBUS 10, Ohio, U.S.A.
(no data received over some years)
- BALINSKY, B. I. F.I.I.E., Dr Biol.Sci. — Dept of Zool., Univ. of the Witwatersrand, Milner Park, JOHANNESBURG, South Africa
- a. The eye-lens correlation. *Xenopus laevis*, *Bufo regularis*, *Bufo carens*, *Phrynobatrachus natalensis*, *Pyxicephalus delalandii*, *Pyxicephalus adspersus (Anura)*
 - b. The development of the alimentary tract and its accessory parts. *Xenopus laevis (Anura)* (Normal Table)
- BALTZER, F. F.I.I.E., Dr, Prof. — Zool. Inst. der Univ. Bern, Sahlistr. 8, BERN, Schweiz
- a. Entwicklung von Bastarden. *Triton* x *Salamandra (Urodea)*, *Paramcentrotus* und *Psammechinus* x *Arbacia (Echinoidea)*
 - b. Chimären. *Triton* x *Bombinator (Amphibia)* (in Zusammenarbeit mit H. EYMAN und W. HENZEN)
 - c. Problem der Homologie. Chimären (*Amphibia*)
 - d. Entwicklung enucleirter Eier mit Blastulakernen. *Triton (Urodea)* (in Zusammenarbeit mit H. E. LEHMANN, Chapel Hill)
- BARIGOZZI, C. Dr Sci., Prof. Ord. Genet. — Ist. di Genet., Via Celoria 10, Univ. di Milano, MILANO, Italia
- a. Development of tumours. (*Urodea*)
 - b. Development of melanomes with different genotypes. *Drosophila (Diptera)*
- BARRY, A. Ph.D., Assoc.Prof. — Dept of Anat., Univ. of Michigan, Med. School, 2500 East Med. Bldg, ANN ARBOR, Mich., U.S.A.
(no data received over some years)
- BARRY, T. H. M.Sc. — Zool. Inst., Univ. of Stellenbosch, STELLEN-BOSCH, South Africa
- a. Ontogenesis of the skull. *Bufo angusticeps (Anura)*
- BARTELMEZ, G. W. Ph.D. — Dept of Embryol., Carnegie Inst. of Washington, Wolfe and Madison Sts. BALTIMORE 5, Md, U.S.A.
- a. Blood supply of uterus. *Macaca mulatta (Primates)*
 - b. Early development of optic vesicle. *Homo sapiens (Primates)*
 - c. Earliest development of oral hypophysis. (*Primates*)
 - d. Effects of rubella on foetus. *Homo sapiens (Primates)*
- BARTH, L. G. F.I.I.E., Ph.D., Prof. — Dept of Zool., Fac. of pure Sci., Columbia Univ., Broadway and 166th St. NEW YORK 27, N.Y., U.S.A.
- a. Chemical embryology of the egg. (*Amphibia*)
 - b. Determination of polarity. (*Hydroidea and Ascidae*)
- BARTH, Mrs L. J. Ph.D. — Dept of Zool., Fac. of pure Sci., Columbia Univ., Broadway and 166th St. NEW YORK 27, N.Y., U.S.A.
- a. Phosphate metabolism in the egg. *Rana pipiens (Anura)*

- BARTHELEMY, Miss A. — Lab. d'Histol., Dép. d'Embryol., Fac. de Méd., 31 Rue Lionnois, NANCY (Meurthe & Moselle), France
- a. Structure du spermatozoïde au microscope optique et au microscope électronique. (*Amphibia*) (en collaboration avec A. DOLLANDER)
- BAST, T. H. Ph.D., B.A., Prof. — Dept of Anat., Univ. of Wisconsin, MADISON, Wis., U.S.A.
- a. Embryology and anatomy of the middle and internal ear. *Homo (Primates)*
- BATTAGLIA, B. Sc.D. — Ist. di Zool. e Anat. Comp., Fac. di Sci., Via Loredan 6, PADOVA, Italia
- a. Cytochemical aspects of typical and atypical spermatogenesis. (*Proso-branchiata, Gastropoda*)
- BATTLE, Miss H. I. Ph.D., Prof. — Dept of Zool., Univ. of Western Ontario, LONDON, Ont., Canada
- a. Effects of urethane (ethyl carbamate) on early developmental processes. *Salmo trutta fario, Brachydanio rerio (Teleostei)*
 - b. A survey of the larval and young fish of central lake Erie. (*Teleostei*)
 - c. Effects of urethane (ethyl carbamate) on development. *Rana pipiens (Anura)*
- BATTY, Th. A.B. — Dept of Anat., Univ. of Kansas, Med. School, LAWRENCE, Kansas, U.S.A.
- a. Development of all systems in relation to behaviour. *Opsanus tau (Teleostei)* (in collaboration with H. C. TRACY and J. WINBLAD)
 - b. Development of the gastro-intestinal tract in relationship to behaviour. *Opsanus tau (Teleostei)*
 - c. Development of the skeletal, blood vascular, and muscular systems in relationship to behaviour. *Opsanus tau (Teleostei)*
- BAUD, C. A. Dr Méd. — Inst. d'Anat., Fac. de Méd., Univ. de Genève, 20 Rue Ecole de Méd., GENÈVE, Suisse
- a. Etude du début de la formation des myofibrilles dans l'ébauche cardiaque. *Gallus (Aves)*
- BAUMANN, J. A. Dr, Prof. — Inst. d'Anat., Fac. de Méd., Univ. de Genève, 20 Rue Ecole de Méd., GENÈVE, Suisse
- a. Etude descriptive du développement de l'innervation du cœur. *Gallus (Aves)* (en collaboration avec J. GALLERA)
- BAUTZMANN, H. Dr Med., Prof. — Anat. Inst. der Univ. Hamburg, Schottmüllerstr. 1, HAMBURG 20, Deutschland
- a. Entwicklungsphysiologie der Primitiventwicklung. (*Vertebrata, bes. Amphibia*)
 - b. Entwicklung des lymphatischen Systems. (*Vertebrata*)
 - c. Amnionentwicklung und Histologie. (*Vertebrata*)
- BAXTER, E. W. B.Sc. — Biol. Dept, Guy's Hosp. Med. School, LONDON S.E. 1, England (U.K.)
- a. Biology, including development and metamorphosis. *Petromyzon (Cyclostomata)*
 - b. Hybridisation experiments. *Lampetra planeri x Lampetra fluviatilis (Cyclostomata)*
 - c. Rearing of larvae in laboratory. *Lampetra planeri* and *Lampetra fluviatilis (Cyclostomata)*

- BEATTY, R. A. B.A., M.A., Ph.D. — Inst. of Animal Genet., Univ. Dept of Genet., King's Buildings, West Mains Rd, EDINBURGH 9, Scotland (U.K.)
a. Heteroploidy and parthenogenesis; egg transfer; operations on embryos. *Mus musculus* (*Rodentia*) and *Lepus cuniculus* (*Lagomorpha*)
b. Breeding of genetically tagged strains for use in experimental embryology. *Lepus cuniculus* (*Lagomorpha*)
- BEAU, A. A. Dr, Prof. — Lab. d'Anat., Inst. Anat., Fac. de Méd., 31 Rue Lionnois, NANCY (Meurthe & Moselle), France
a. Recherches sur le développement des ligaments latéraux du genou. *Homo* (*Primates*)
- BECHT, G. M.Sc. — Physiol. Lab. of the Univ. of Amsterdam, Rapenburgerstraat, AMSTERDAM, Holland
a. Influence of duration and intensity of illumination on development. *Xenopus laevis* (*Anura*)
- BEENAKKERS, A. M. T. B.Sc. — Zool. Lab. der Rijks Univ., Janskerkhof 3, UTRECHT, Holland
a. Analysis of head malformations caused by centrifuging the eggs. *Limnaea stagnalis* (*Gastropoda*)
- BÉLANGER, L. F. Prof. — Dept of Histol., Fac. of Med., Univ. of Ottawa, OTTAWA, Quebec, Canada
(no data received on Nov. 1st, 1953)
- BELLAIRS—MORGAN, Mrs M. R. B.Sc., Ph.D. — Anat. School, Univ. of Cambridge, Downing Street, CAMBRIDGE, England (U.K.)
a. Development of the foregut. *Gallus domesticus* (*Aves*)
b. Morphogenetic movements and factors affecting them. *Brachydanio rerio* (*Teleostei*), *Gallus domesticus* (*Aves*)
- BELLANCA, Miss A. Dr — Ist. di Zool. e Anat. comp., Via Università 4, MODENA, Italia
a. Activity of sexual hormones on the sexual differentiation of gonads and Bidder's organs in tadpoles. *Rana dalmatina*, *Bufo bufo* (*Anura*)
- BENAZZI, M. Prof. ord. — Ist. di Zool. e Anat. Comp. dell'Univ., Via A. Volta 4, PISA, Italia
a. Fertilization, pseudogamy, polyploidy and heredity. (*Tricladida*, *Turbellaria*)
b. Hybrids. *Triturus vulgaris* x *Tr. cristatus* (*Urodea*)
- BENAZZI—LENTATI, Mrs G. Lib. Doc. — Ist. di Zool. e Anat. Comp. dell'Univ., Via A. Volta 4, PISA, Italia
a. Ovo- and spermatogenesis; fertilization and cytology. (*Tricladida*, *Turbellaria*)
- BENGMARK, S. Med.kand. — Tornblad-Inst. of comp. Embryol., Biskops-gatan 7, LUND, Sweden
(no data received on Nov. 1st, 1953)
- BENOIT, J. Dr en Méd., Dr ès Sci., Prof. — Lab. d'Histophysiol., Coll. de France, Place Marcelin Berthelot, PARIS Ve, France
a. Development of gonads, hypophysis and hypothalamus. *Gallus*, *Anas* and *Columba* (*Aves*) (in collaboration with I. ASSENMACHER)
- BENOIT, J. A. A. Agr. d'Anat. — Ecole Nationale Vétérinaire, TOULOUSE, France
a. Localisation des rayons X avec l'appareil Philips de contact: application à l'embryogénie. *Salmo fario* (*Teleostei*)

BER, A. Dr, Prof. — Dept of Endocrinol., Fac. of Med., Acad. of Lódź,
Nowotki 137, LÓDŹ, Poland
(no embryological work in progress)

BERG, W. E. A.B., M.S., Ph.D., Prof. — Dept of Zool., Univ. of Calif.,
BERKELEY 4, Cal., U.S.A.

- a. Physiological studies of mosaic development. Metabolism of isolated blastomeres and polar lobes. *Mytilus edulis* (*Lamellibranchia*)

BERGEIJK, W. A. van B.Sc. — Dept of Zool., State Univ. of Iowa, IOWA CITY, Iowa, U.S.A.

- a. Physiology of the ear during larval, metamorphic and adult stages.
(*Amphibia*)

BERGQUIST, H. Ph.D. — Inst. of Anat., Med. Fac., GOTHENBURG, Sweden

(no data received on Nov. 1st, 1953)

BERRILL, N. J. Ph.D., D.Sc., Prof. — Dept of Zool., McGill Univ., MONTREAL, Quebec, Canada
(no data received over some years)

BIER, K. Dr rer. nat. — Inst. für Angewandte Zool. der Univ., Naturw. Fak., Röntgenring 10, WÜRZBURG, Deutschland.

- a. Untersuchungen über das Schicksal des Polplasmas während der Frühembryogenese. *Camponotus ligniperda*, *Formica rufa* (*Formicidae*, *Hymenoptera*)
- b. Entwicklung der larvalen Gonaden. *Formica rufa* u.a. (*Formicidae*, *Hymenoptera*)

BIJTEL, Miss J. H. Dr Sc., M.D. — Anat.-Embryol. Lab. der Rijks Univ., Oostersingel 69, GRONINGEN, Holland

- a. Investigations concerning the process of outgrowth of the tail with special reference to the rôle of the chorda dorsalis and the tail mesoderm. *Ambystoma mex.*, *Triton taen.* and *Xenopus laevis* (*Amphibia*)
- b. Experiments concerning the factors which determine the normal course of the outgrowing pronephric duct. *Ambystoma mex.*, *Triton taen.* and *Xenopus laevis* (*Amphibia*)
- c. Development and phylogenetic origin of the columella auris. *Ambystoma mex.*, *Triton taen.* and *Xenopus laevis* (*Amphibia*)
- d. The development of the eye. *Xenopus laevis* (*Anura*) (Normal Table)

BILLINGHAM, R. E. M.A., D.phil. (Oxon) — Dept of Zool. and Comp. Anat., Univ. Coll. London, Gower St, LONDON W.C. 1, England (U.K.)

- a. Development of capacity to respond to homologous antigens. *Bos taurus* (*Artiodactyla*) and *Mus musculus* (*Rodentia*)

BISHOP, D. W. Ph.D. — Dept of Embryol., Carnegie Inst. of Washington, Wolfe and Madison Sts, BALTIMORE 5, Md, U.S.A.

- a. Physiology and metabolism of spermatozoa. (*Mammalia*)
- b. Intra-tubal factors influencing sperm motility and transport. (*Mammalia*)

BISS, R. Dr en Méd. — Lab. des Travaux Anat., Fac. de Méd. Nouvelle, 43 Rue des St Peres, PARIS VIe, France

- a. Développement de l'encephale et des nerfs craniens. *Homo* (*Primates*) (en collaboration avec Ch. EYRIES)
- b. Oreille interne et complexe acoustico-facial. *Homo* (*Primates*) (en collaboration avec Ch. EYRIES)

- c. Rhombomerie, *Homo (Primates)* (en collaboration avec Mrs M. BISS—BEZINE et Ch. EYRIES)
 - d. Origine du nerf pathétique. *Homo (Primates)* (en collaboration avec Mrs M. BISS—BEZINE et Ch. EYRIES)
- BISS—BEZINE, Mrs M. Dr en Méd. — Lab. des Travaux Anat., Fac. de Méd. Nouvelle, 43 Rue des St Peres, PARIS VIe, France
- a. Rhombomerie. *Homo (Primates)* (en collaboration avec Ch. EYRIES et R. BISS)
- BLECHSCHMIDT, E. Dr Med., o.ö. Prof. — Anat. Inst. der Univ., Burgstr. 51, GÖTTINGEN, Deutschland
- a. Entwicklungs dynamik. *Homo (Primates)*
- BLOKZIJL, E. J. — Anat.-Embryol. Lab. der Rijks Univ., Oostersingel 69, GRONINGEN, Holland
- a. A morphological and experimental study of the development of the limb buds with special reference to the rôle played by the myotomes in the development of the musculature of the limbs. *Ambystoma mex. (Urodela)* and *Mus musculus albinus (Rodentia)*
- BLOUNT, R. F. B.S., M.S., Ph.D., Prof. — Dept of Anat., Med. Branch, Univ. of Texas, GALVESTON, Tex., U.S.A.
- a. Relations of the hypophysis to development. *Ambystoma maculatum (Urodela)*

FAASSEN, F. van — Anat.-Embryol. Lab., Free Univ., Pr. Hendriklaan 27, AMSTERDAM Z, Holland

a. Teratogenetic effect of thyroectomised pregnant animals on the developing embryo. *Rattus norvegicus albinus (Rodentia)* (in collaboration with J. LANGMAN)

FABER, J. B.Sc. — Hubrecht Lab., Internat. Embryol. Inst., Janskerkhof 2, UTRECHT, Holland

— Lab. for Comp. Physiol., State Univ. of Utrecht, Jan van Galenstr. 17, UTRECHT, Holland

a. Preparing the catalogue of the Central Embryological Collection of slides and alc. material of the Hubrecht Laboratory. (*Anura*)

b. Development of behaviour. *Triturus taeniatus, Ambystoma mexicanum (Urodela)*

FANKHAUSER, G. F.I.I.E., Ph.D., Prof. — Dept of Biol., Princeton Univ., PRINCETON, N.J., U.S.A.

a. Cytological study of polyploidizing effect of heat and cold on fertilized eggs, and of parthenogenetic cleavage induced by heat and cold treatment of unfertilized eggs. *Triturus viridescens (Urodela)*

b. Study of effects of triploidy on development of gonads. *Triturus viridescens (Urodela)*

c. Study of the reactions of diploid and triploid larvae and metamorphosed animals to pituitary hormones. *Triturus viridescens (Urodela)*

d. Thyroidectomy in diploid and triploid embryos. Effects of thiourea, etc. *Triturus viridescens, Eurycea bislineata (Urodela)*

e. Study of progeny of triploid, tetraploid and other heteroploid individuals; their chromosome number, mortality, pathology etc. *Ambystoma mexicanum (Urodela)* (in collaboration with R. R. HUMPHREY)

f. Studies on spontaneous haploidy and polyploidy. *Ambystoma mexicanum (Urodela)* (in collaboration with R. R. HUMPHREY)

FARINELLA—FERRUZZA, Mrs N. Dr — Ist. di Zool., Via Archirafi 18, PALERMO, Italia

a. Xenoplastic tail transplantations. (*Amphibia*)

FAURÉ FREMIET, E. F.I.I.E., Dr, Prof. — Coll. de France, Place Marcelin Berthelot, PARIS Ve, France (no data received)

FAUTREZ, J. C. M.D., Prof., Member of the Royal Flemish Acad. of Sci. — Lab. of Anat., Fac. of Med., Univ. of Gent, Bylokekaai 1, GENT, Belgium

a. Histophotometrical studies of DNA content in germs and tissues.

FAUTREZ—FIRLEFYN, Mrs N. J. — Lab. of Anat., Fac. of Med., Univ. of Gent, Bylokekaai 1, GENT, Belgium

a. Cytochemical studies of embryonic development. *Artemia salina (Crustacea)*

FELDMAN, M. M.Sc., Ph.D. — Inst. of Animal Genet., Univ. Dept of Genet., King's Buildings, West Mains Rd, EDINBURGH 9, Scotland (U.K.)

— Dept of Zool., The Hebrew Univ., JERUSALEM, Israel

- a. Study on disaggregated cells of embryos. *Triton (Urodea)*
 1. The development of a tissue specific adhesiveness after reaggregation.
 2. Processes of induction in reaggregated cells.
- FELL, Miss H. B. F.I.E., Dr — Strangeways Research Lab., Wort's Causeway, CAMBRIDGE, England (U.K.)

b. Epithelio-mesenchymal inductive interactions in early rudiments. *Mus musculus (Rodentia)*
c. Time of cytodetermination in relation to morphogenetic and histogenetic events. *Mus musculus (Rodentia)*
- GRODZIŃSKI, Z. Prof. — Zakład Anat. Porównawczej U. J. im. H. Hoyera, św. Anny 6, KRAKOW, Poland
a. Influence of temperature upon the isolated heart's rate of embryos. *Salmo (Teleostei)*
b. Development of the blood vessels in the tail of embryos. *Salmo (Teleostei)*
- GROOT, B. de B.Sc. — Zool. Lab. der Rijks Univ., Janskerkhof 3, UTRECHT, Holland
a. Analysis of lithium action. *Limnaea stagnalis (Gastropoda)* (in collaboration with Miss C. DINGER, W. J. van DONGEN, Miss H. E. van HEYNINGEN, C. R. JANSEN and Chr. P. RAVEN)
- GRUENWALD, P. M.D. — Beth-El Hospital, Linden Boulevard and Rockaway Parkway, BROOKLYN 12, N.Y., U.S.A.
a. Embryonic development of selenium-induced malformations. *Gallus domesticus (Aves)*

- b. Systematic investigation of current cases of prenatal disease and malformation in autopsy material (Part of „Brooklyn Survey of Neonatal Pathology“). *Homo (Primates)*

GRÜNEBERG, H. Ph.D., M.D., D.Sc. — Dept of Genetics, Univ. Coll. London, Gower St, LONDON W.C. 1, England (U.K.)

- a. Developmental genetics of the skeleton; effects of major genes; development and genetics of patch, a semi-dominant spotting gene with teratological effects in the homozygote. *Mus musculus (Rodentia)*

GRÜNTHAL, E. Dr — Hirnanat. Inst. der Psychiatr. Univ. klinik, Med. Fak., Waldau, BERN, Schweiz

- a. Hirnentwicklung: Bauplan von Zwischenhirn und Endhirn. *Gallus (Aves)*, *Mus (Rodentia)* und *Homo (Primates)*

GUARDABASSI, Miss A. Dr — Inst. of comp. Anat., Via Giovanni Giolitti 34, TORINO, Italy

- a. Study of the course and connections of the retinal fibers following rotation of the eye anlage. *Bufo vulgaris* and *Rana esculenta (Anura)*
b. Autoplastic interchange of the eye anlagen (left to right and viceversa) to study the course and arrangement of the retinal fibers. *Rana esculenta*, *Bufo vulgaris (Anura)*
c. Influence of thyroxine and thymus on lime sacs of tadpoles. *Rana dalmatina (Anura)*
d. The development of the endolymphatic sac following thymus removal in tadpoles. *Xenopus laevis (Anura)*

GUBBAY, Miss V. B.Sc.Hons. — Dept of Zool., Univ. of the Witwatersrand, Milner Park, JOHANNESBURG, South Africa

- a. Early embryology and placenta. *Eremitalpa granti (Insectivora)*

GUSTAFSON, G. S. Fil.mag. — Zootom. Inst., Univ. of Stockholm, 116 Drottninggatan, STOCKHOLM, Sweden

- a. Ontogeny of the skull. (*Gadidae* and *Acanthopterygii. Teleostei*)

GUSTAFSON, T. Fil.Dr — Wenner-Grens Inst. for experimental Biology, Norrtullsgatan 16, STOCKHOLM Va., Sweden

a. Hormonal mechanism of metamorphosis. *Bombyx mori*, *Luehdorfia japonica*, *Philosamia cynthia ricini* (*Lepidoptera*) (in collaboration with M. ICHIKAWA)

NIU, M. C. Dr — Dept of Biol. Sci., Stanford Univ., STANFORD, Cal., U.S.A.

- a. The differentiation of macrophages into melanophores following their ingestion of pigmentary debris released by degeneration of preexisting melanophores. (*Amphibia*) (in collaboration with V. C. TWITTY)
- b. The migratory behaviour of single neural crest melanoblasts isolated in capillary tubes of extremely small bore. (*Amphibia*) (in collaboration with V. C. TWITTY)
- c. The role of mesodermal cells in epidermis formation. (*Amphibia* and *Mammalia*)

NÜESCH, H. Dr Sc., P.D. — Zool. Anstalt der Univ., Rheinsprung 9, BASEL, Schweiz

- a. Einfluss des Nervensystems auf die Entwicklung anderer Organe. *Telea polyphemus* (*Saturnidae, Lepidoptera*)
- b. Entwicklung der imaginalen Muskeln. *Telea polyphemus* (*Saturnidae, Lepidoptera*)

NYHOLM, K. G. Fil.Dr — Zool. Inst., Uppsala Univ., UPPSALA, Sweden

- a. Study of the development. (*Echinoderidae, Aschelminthes*)
- b. Study of the development. *Labidoplax buskii* (*Echinodermata*)
- c. Study of the life-history of monothalamous forms. (*Rhizopoda*)

O'BRIEN, B. R. A. — Dept of Histol. and Embryol., Univ., of Sydney, SYDNEY, N.S.W., Australia

- a. Enzymatic pattern in normal and regenerating tissue in relation to capacity for, and rate of regeneration. (*Annelida*)

O'BRIEN, J. P. Ph.D. — Dept of Biol., Marquette Univ., 1217 West Wisconsin Ave, MILWAUKEE 3, Wis., U.S.A.

- a. Regression of larval and adult limb and tail following exposure to X-rays or denervation. *Triturus viridescens* and *Ambystoma punctatum* (*Urodeла*)
- b. Spindle-cell sarcoma of adult animals. *Triturus viridescens* and *Ambystoma punctatum* (*Urodeла*)

- c. Radiosensitivity in relation to temperature prevailing during exposure.
Rana catesbeiana, *Rana pipiens*, *Triturus viridescens* (*Amphibia*); *Mus rattus* (*Rodentia*) and *Oryctolagus cuniculus* (*Lagomorpha*)
- O'CONNOR, R. J. M.D., D.T.M. — Westminster Med. School, Horsferry Rd, LONDON S.W.1, England (U.K.)
 - a. The metabolism of cell division and cell differentiation. (*Vertebrata*)
 - b. Metabolic measurement during ontogenesis. (*Aves*)
- OKA, H. Ph.D. (Tokyo). Prof. — Inst. of Zool., Univ. of Education, Otsuka-Kubomachi 24, Bunkyo, TOKYO, Japan
 - a. Limb induction. *Hynobius tokyoensis* (*Urodela*)
 - b. Budding in various species. („Compound” *Ascidiae*)
 - c. Experimental studies on metamorphosis in various species. („Compound” *Ascidiae*)
- OKADA, T. — Lab. of Embryol. and Exper. Morphol., Zool. Inst., Dept of Sci., Kyoto Univ., KYOTO, Japan
 - a. Developmental mechanism of entoderm differentiation. *Triturus pyrrhogaster* and *Hynobius nebulosus* (*Urodela*)
 - b. Role of the yolk mass in early morphogenetic movement. *Triturus pyrrhogaster* and *Hynobius nebulosus* (*Urodela*)
 - c. Regional differences of induced structure.
- OKADA, Y. K. F.I.I.E., Dr, Prof. — Zool. Inst., Fac. of Sci., Tokyo Univ., TOKYO, Japan
- OKAZAKI, Miss K. — Embryol. Section, Dept of Biol., Tokyo Metropolitan Univ., Setagaya-ku, TOKYO, Japan
 - a. Metamorphosis of partial larvae. *Peronella* (*Clypeastroidea*, *Echinoidea*)
 - b. A study of skeleton formation. (*Echinodermata*)
- OKAZAKI, R. M.A. (Rigakushi) — Biol. Inst., Fac. of Sci., Nagoya Univ., Chigusa-Ku, NAGOYA, Japan
 - a. Studies on the proteins of the early embryo. (1) Fractionation and physico-chemical characterization of the proteins; (2) Inducing capacity of the various proteins; (3) Regional and temporal changes of the protein fractions; (4) Physical effects of Li and SCN on the proteins; (5) Inducing capacity of the organizer region free from nucleic acids. *Triturus* (*Urodela*) (in collaboration with S. OSAWA)
 - b. Role of energy-rich phosphate bond in the cortical change of eggs. Various species (*Echinodermata*)
 - c. Effect of dinitrophenol on the organizer action. *Triturus* (*Urodela*)
- OKSCHE, A. A. Dr Med. — Anat. Inst. der Univ., Robert Kochstr. 6, MARBURG Lahn, Deutschland
 - a. Änderungen des Kaulquappen-Wachstums nach beiderseitiger Augen-Extraktion. Es soll hierbei die Rolle des Hypophysen-Zwischenhirn-Systems und der Epiphyse untersucht werden. *Bufo vulgaris* (*Anura*)
 - b. Die Feinstruktur der Sinneszellen des Organon frontale bei qualitativ und quantitativ modifiziertem Lichtreiz. Verhalten der spezifischen, mit Eisen-Haemotoxylin färbbaren Zellstrukturen während des Individualzyklus. *Bufo vulgaris* (Larven) (*Anura*)
- OLIVO, O. M. Med.Dr, Ord.Prof. — Ist. di Istol. e Fisiol. gen., Fac. di Med., Via Belmeloro 8, BOLOGNA, Italia

- OLSSON, R. Fil.mag. — Zootom. Inst., Univ. of Stockholm, 116 Drottninggatan, STOCKHOLM, Sweden
a. Development of the anterior hypophysis. *Larus ridibundus* (Aves)
Polypterus (*Brachiopterygii*)
- OMODEO, P. Dr Sci. — Ist. di Biol. e Zool. gen., Fac. di Med., Piazza S. Agostino 4, SIENA, Italia (no data received on Nov. 1st, 1953)
- OORT, J. — Lab. for Exper. Histol., Fac. of Med., Univ. of Leyden, Wassenaarseweg, Boerhaavekwartier, LEIDEN, Holland
a. Development of the anterior hypophysis. *Larus ridibundus* (Aves)
- OPPENHEIMER, Miss J. M. B.A., Ph.D. — Dept of Biol., Bryn Mawr Coll., BRYN MAWR, Pa, U.S.A.
a. Experimental analysis of regional determination within the brain. *Fundulus heteroclitus* (*Teleostei*)
- ORLANDI, Miss A. Dott Sci Biol. — Ist. di Zool. e Anat. Comp., Univ. di Milano, Via Celoria 10, MILANO, Italia
a. Nucleoproteins and chromosomes. (*Vertebrata*)
b. Yolk granula. (*Amphibia*)
- ORSINI, Mrs M. C. WARD — Ph.D., B.A. — Dept of Anat., Univ. of Wisconsin, MADISON, Wis., U.S.A.
a. Fetal membranes, giant cells, and pregnancy changes in uterine vessels. *Cricetus auratus* (*Rodentia*)
- ORSKA, Miss J. Ph.D. — Zakład. Anat. Porównawczej, Inst. Zool. Uniw., ul. Sienkiewicza 21, WROCŁAW, Poland
a. Development of the vertebral column centra. (*Salmonidae* and *Cyprinodontidae*, *Teleostei*)
- ORTOLANI, Miss G. Dr — Ist. di Zool., Via Archirafi 18, PALERMO, Italia
a. Morphogenetic movements. (*Ascidiae*)
b. Structure and potencies of the egg before cleavage. (*Ascidiae*)
- ORTS LLORCA, F. Prof. — Lab. de Anat. y Embryol., Fac. de Med., CADIZ, Spain
a. Embryology of the lungs. (*Mammalia*)
b. Cyclop. *Homo sapiens* (*Primates*)
- OSAWA, S. M.A. (Rigakushi) — Biol. Inst., Fac. of Sci., Nagoya Univ., Chigusa-Ku, NAGOYA, Japan

- a. Cytochemical and microchemical study of the developing nervous system and its relationship to developing behaviour patterns. *Ambystoma maculatum* (*Urodela*) (in collaboration with Mrs E. L. WENGER)
- ROON, A. C. de B.Sc. — Zool. Lab. der Rijks Univ., Janskerkhof 3, UTRECHT, Holland
- a. Influence of heat shock. *Limnaea stagnalis* (*Gastropoda*) (in collaboration with G. A. VAN ERKEL and A. M. STADHOUDERS)
 - b. Development of diencephalon. *Torpedo marmorata* (*Selachii*)
- ROOSEN-RUNGE, E. C. M.D. — School of Med., Univ. of Washington, SEATTLE 5, Wash., U.S.A.
- a. Quantitative studies in spermatogenesis. (*Mammalia*)
- ROSE, S. M. Ph.D., Prof. — Dept of Zool., Univ. of Illinois, URBANA, Ill., U.S.A.
- a. Embryological studies in relation to regeneration, tumor formation and specific inhibition of embryonic differentiation. *Rana*, various spec. (*Anura*)
- ROSENBAUM, R. M. B.S., Ph.D. — Biol. Lab., Harvard Univ., CAMBRIDGE 38, Mass., U.S.A. (no data received over some years)
- ROSIN, S. Dr. P.D. — Zool. Inst. der Univ. Bern, Sahlstr. 8, BERN, Schweiz
- a. Borstenmuster und Flügelenwicklung. *Drosophila* (*Diptera*) (in Zusammenarbeit mit W. NEF)
- ROSS, Miss J. R. W. B.Sc., M.B., Ch.B. — Anat. Dept, Charing Cross Hosp. Med. School, 62 Chandos Place, LONDON W.C.2, England (U.K.)
- a. The development of the genital tract. *Ovis aries* (*Artiodactyla*)
- ROSSINI, Miss M. C. Ph.D. — Ist. di Anat. Comp., Via Belmeloro 8, BOLOGNA (103), Italia
- a. Action of podophyllin on early development. *Rana* (*Anura*)
 - b. Analysis of formative movements during neurulation (with vital stains). (*Amphibia*)
- ROSTAND, J. — 29 Rue Pradier, VILLE d'AVRAY, (Seine-et-Oise), France
- a. Parthénogénèse et gynogénèse. Régulation chromosomique par le froid. (*Amphibia*)
 - b. Mutations (Polydactylie, Ectrodactylie, etc.): comportement héréditaire et physiologie génétique. (*Amphibia*)

- c. Modifications des noyaux au cours de l'ontogenèse. (*Amphibia*)
 - d. Survie de l'ovule *in vitro*, à basse température. (*Amphibia*)
- ROTHFELS, U. Ph.D. — Div. of Chem. Embryol., Med. Center, Univ. of Colorado, 4200 East Ninth Ave, DENVER 20, Col. U.S.A.
- a. Study of differentiation of somites in explants (Spratt technique). *Gallus (Aves)* (in collaboration with H. HERRMANN)
 - b. Study of developmental disturbances related to nutritional deficiencies investigated by application of anti-vitamins and anti-amino acids to the intact egg and to explants (somites). (*Aves*) (in collaboration with H. HERRMANN)
- RÓŻEWSKA, Miss J. W. Physician — Inst. of Histol. & Embryol., Acad. of Med., Narutowicza 60, ŁODZ, Poland *Gallus (Aves)*
- a. Influence of sulphonamides on the development of germinal layers.
 - b. Influence of sulphonamides on the size of embryos. *Gallus (Aves)*
- RUDEWICZ, Mrs Cz. Physician — Inst. of Histol. & Embryol., Acad. of Med., Narutowicza 60, ŁODZ, Poland
- a. Influence of sulphonamides on the structure of cell nuclei. *Gallus (Aves)*
 - b. Influence of sulphonamides on the size of embryos. *Gallus (Aves)*
- RUDNICK, Miss D. Ph.D. — Osborn Zool. Lab., Yale Univ., NEW HAVEN 11, Conn.
- Dept of Pharmacol., the N.Y. Psychiatric Inst., 722 W. 168 St, NEW YORK 32, N.Y., U.S.A.
- a. Protein-synthesising mechanisms in development. *Gallus (Aves)*
- RUGH, R. A.B., M.A., Ph.D. — Radiological Research Lab., Dept of Radiology, Coll. of Physicians & Surgeons, Columbia Univ., 630 West 168th Str., NEW YORK 32, N.Y., U.S.A.
- a. Radiobiology.
 - b. Experimental Embryology.
 - c. Effect of ionizing radiations on the fetus.
- RUNNER, M. N. Ph.D. — Roscoe B. Jackson Mem. Lab., BAR HARBOR, Me, U.S.A. (no data received on Nov. 1st, 1953)

- a. Recherches sur l'action d'agents physiques et chimiques sur la différenciation sexuelle.
- b. Recherches sur l'intersexualité expérimentale produite par irradiation aux rayons X. (*Aves*) (en collaboration avec Et. WOLFF)
- c. Action de substances chimiques sur les gonades embryonnaires cultivées *in vitro*.

SANDE, Miss A. van der B.Sc. — Hubrecht Lab., Internat. Embryol. Inst., Janskerkhof 2, UTRECHT, Holland

- a. Analysis of the extra-neural extension of the activation field in normal development. (*Urodela*)

SANDISON, Miss E. E. B.Sc. (Hons) — Dept of Zool., Univ. of Edinburgh, West Mains Rd, EDINBURGH 9, Scotland (U.K.)

- a. The identification of the Nauplii of some South African forms with notes on their life histories. (*Cirripedia*)

SANTLER, Miss J. E. B.Sc. — Dept of Embryol., Univ. Coll. London, Gower St, LONDON W.C.1, England (U.K.)

- a. Regeneration and induced proliferation in the adult. *Rattus norvegicus* (*Rodentia*) (in collaboration with M. ABERCROMBIE)

SATO, T. D.Sc., Dr Phil. nat., Prof. — Biol. Inst., Fac. of Sci., Nagoya Univ., Chigusa-Ku, NAGOYA, Japan

- a. Linsenbildende Potenz des Pigmentepithels. *Hynobius tokyoensis* (*Urodela*) und *Rana temporaria* (*Anura*)
- b. Linsenregeneration. *Cobitidinae* (und verwandte Teleostei)

SAUNDERS, J. W. B.S., M.S., Ph.D. — Dept of Biol., Marquette Univ., 1217 West Wisconsin Ave, MILWAUKEE 3, Wis., U.S.A.

- a. Identification of prospective pigment cells. *Gallus domesticus* (*Aves*) and *Mus musculus* (*Rodentia*)
- b. Factors affecting the rate of melanin synthesis in embryonic tissues. *Gallus domesticus* (*Aves*) and *Mus musculus* (*Rodentia*)
- c. The role of the ectoderm in the development of the wing. *Gallus domesticus* (*Aves*)
- d. An analysis of the factors affecting tract-specificity in embryonic feather areas. *Gallus domesticus* (*Aves*)
- e. Effect of temperature on X-ray resistance of embryonic tissues. *Gallus domesticus* (*Aves*) and *Mus musculus* (*Rodentia*)

SAUSER, G. Dr, Dr, Mr, Prof. — Histol.-Embryol. Inst. der Univ., INNSBRUCK, Tyrol, Austria

- a. Morphomechanik. *IIomo* (*Primates*)
- b. Histophysiologie und quantitative Cytologie.
- c. Färbungs- und Konservierungstechnik. *Homo* (*Primates*)

SAWIN, P. B. Sc.D., Prof. — Roscoe B. Jackson Memorial Lab., Box 558, BAR HARBOR, Me, U.S.A. (no data received over some years)

SAXÉN, L. O. M.A., B.M. — Zool. Lab., Univ. of Helsinki, Dept of Physiol., P. Rautatiekatu 13, HELSINKI, Finland

- a. The development of the visual cells. The development of the photo-mechanical movements. *Rana temporaria* L. and *Xenopus laevis* (*Anura*)

- b. The appearance of mitoses in the retina during the development (colchicine studies). *Rana temporaria* L. and *Xenopus laevis* (*Anura*)

SCHECHTMAN, A. M. F.I.I.E., A.B., Ph.D., Prof. — Dept of Zool., Univ. of Calif., LOS ANGELES 24, Cal., U.S.A.

- a. Surface active materials: quantitative changes during the course of development.
- b. Studies of the lipid in the serum of the developing embryo. *Gallus domesticus* (*Aves*) (in collaboration with E. WELLER)
- c. Biological characteristics of the developing blood of the embryo. *Gallus domesticus* (*Aves*) (in collaboration with Miss P. KNIGHT)
- d. Electrophoresis of serum of the developing embryo. *Gallus domesticus* (*Aves*) (in collaboration with W. G. HEIM)
- e. Stability of cellular particulates in developing tissues and in neoplasms. (*Aves* and *Mammalia*) (in collaboration with A. A. HIRATA)
- f. Induction of neural plate by dead and modified embryonic tissues. *Hyla regilla* (*Anura*) (in collaboration with A. S. SMITH)

SCHEIB—PFLEGER, Mrs D. Lic. ès Sci. — Lab. de Zool. de la Fac. des Sci. et Lab. d'Embryol. et Tératol. expér. du C.N.R.S., Inst. de Zool. et de Biol. gén., 12 Rue de l'Université, STRASBOURG, France

- a. Rôle des hormones dans la différenciation sexuelle. Etudes biochimiques sur la régression des canaux de Müller. *Gallus* (*Aves*)

SCHENK, R. Dr Med. — Anat. Inst. der Univ., Gloriastr. 19, ZÜRICH, Schweiz

- a. Untersuchungen über den Implantationsvorgang, unter besonderer Berücksichtigung des Verhaltens der Ribonukleinsäure. *Hemicricetus auratus* (*Rodentia*)
- b. Untersuchungen über die Wirkung von Nitrogen Mustard auf die embryonale Entwicklung. *Triton* (*Urodea*)

SCHJEIDE, A. E. A.B., M.S., Ph.D. — Dept of Zool., Univ. of Calif., LOS ANGELES 24, Cal., U.S.A.

- a. Inorganic ions of serum in the developing embryo. *Gallus domesticus* (*Aves*)

SCHNEIDER, R. Dr med. — Dr Senckenberg. Anat. Inst., Med. Fak. der Univ., Ludwig Rehnstr. 14, FRANKFURT/Main-Süd, Deutschland

- a. Development of the skull. *Bradypus tridactylus* (*Edentata, Mammalia*)

SCHNETTER, M. Dr phil. — Zool. Inst. der Univ., Katharinenstr. 20, FREIBURG i. Brsg., Deutschland

- a. Keimblätterbildung und Differenzierungsleistungen in isolierten Eiteilen. *Apis mellifica* (*Hymenoptera*) (gemeinsam mit Miss E. LOECHER)
- b. Entwicklung und Bedeutung der Vitellophagen. *Apis mellifica* (*Hymenoptera*) (gemeinsam mit Miss M. LEIBBRANDT)
- c. Eibildung bei Arbeiterinnen (Drohnennütterchen). *Apis mellifica* (*Hymenoptera*) (gemeinsam mit Miss H. DREISCHER)

- WILLIAUME, R. — Lab. de Biol. Gén., Fac. des Sci. de Bordeaux, 40 Rue Lamartine, TALENCE (Gironde), France
a. Développement du système rénal. *Xenopus laevis* (Anura) (Normal Table) (en collaboration avec R. CAMBAR)
- WILLIER, B. H. F.I.I.E., B.S., Ph.D., Sc.D., Prof. — Dept of Biol., The Johns Hopkins Univ., Charles and 34th Sts, BALTIMORE 18, Md, U.S.A.
a. The mechanism of interaction of melanoblasts of known genotype with feather papilla in the production of feather pigmentation pattern. *Gallus domesticus* (various varieties) (Aves)
b. Factors regulating migration of melanoblasts and their growth (multiplication) and differentiation (synthesis of specific melanin granules). *Gallus domesticus* (various varieties) (Aves)
c. The role that sex and other hormones play in modifying the phenotypic expression of melanoblasts in color pattern formation. *Gallus domesticus* (various varieties) (Aves)

- d. Ontogeny of endocrine correlation (a synthetic review). (*Vertebrata*)
WILSON, J. W. Ph.D., Prof. — Arnold Biol. Lab., Brown Univ., PROVIDENCE 12, R.I., U.S.A.
 a. A study of mitotic activity and other cytological phenomena in liver regeneration. (*Vertebrata*)
WINBLAD, J. A.B. — Dept of Anat., Univ. of Kansas, Med. School, LAWRENCE, Kansas, U.S.A.
 a. Development of all systems in relation to behaviour. *Opsanus tau* (*Teleostei*) (in collaboration with H. C. TRACY and Th. BATTY)
 b. Pharmacodynamics of development. *Opsanus tau* (*Teleostei*)
WINDLE, W. F. B.S., M.S., Ph.D., Sc.D., Prof. — Baxter Laboratories, MORTON GROVE, Ill., U.S.A.
 — (as Visiting Research Professor) Dept of Anat., Univ. of Pennsylvania, School of Med., PHILADELPHIA 4, Pa, U.S.A.
 a. Factors influencing regeneration of nerve fibers in the central nervous system of adult animals. *Felis domestica* (*Carnivora*). (*Anthropoidea*) (in collaboration with J. L. LITTRELL and E. G. STUART)
 b. Growth and regeneration of the severed spinal cord in embryos. *Gallus domesticus* (*Aves*) (in collaboration with J. L. LITTRELL and E. G. STUART)
WINGSTRAND, K. G. Dr Phil. — Embryol. Dept, Zool. Inst., Univ. of Lund, LUND, Sweden
 a. Embryology of the pituitary. (*Vertebrata*)
WINOWSKA, Mrs J. M.Sc. — Zakład Anat. Porównawczej, Inst. Zool. Uniw., ul. Sienkiewicza 21, WROCŁAW, Poland
 a. Development of the air-bladder. (*Euphysoctisti, Teleostei*)
WISLOCKI, G. B. F.I.I.E., M.D., A.M., Sc.D., Prof. — Dept of Anat., Harvard Medical School, 25 Shattuck St, BOSTON 15, Mass., U.S.A.
 a. Study on the histochemical reactions of the placenta and fetal membranes. *Rattus norvegicus* (*Rodentia*), *Lepus cuniculus* (*Lagomorpha*), *Homo* (*Primates*)
 b. Study on the structure of the placenta, investigated by electron microscopy. (*Rodentia*), *Homo* (*Primates*)
WITSCHI, E. F.I.I.E., Ph.D., Prof. — Dept of Zool., State Univ. of Iowa, IOWA CITY, Iowa, U.S.A.
 a. Metabolism of normal and overripe eggs. (*Anura*)
 b. Malformations. (*Vertebrata*)
 c. Sex inheritance and differentiation (normal and experimental). *Rana*, *Bufo*, *Alytes* and *Xenopus* (*Anura*) (*Urodela*)
 d. Parabiosis and hormones in sex differentiation. *Triturus torosus*
 e. Metamorphosis of the ear. (*Anura*)
 f. Embryologic and endocrine studies in adreno-gonadal relationships. (*Amphibia*, *Aves* and *Mammalia*)
 g. Nutritional conditions in the incubating egg. (*Aves*)
WITTEK, Miss M. — Lab. d'Anat. et d'Embryol., Fac. de Méd. de l'Univ., 97 Rue aux Laines, BRUXELLES, Belgique
 (no data received on Nov. 1st, 1953)
WOELLWARTH, C. v. Dr Phil. — Heiligenberg-Inst., (17b) HEILIGENBERG, Kreis Ueberlingen/Bodensee, Deutschland
 (no data received on Nov. 1st, 1953)

WOERDEMAN, M. W. F.I.I.E., M.D., D.Sc. (Oxon). Prof. — Anat.-Embryol. Inst., Municipal Univ. of Amsterdam, Mauritskade 61, AMSTERDAM O, Holland

- a. Lensregeneration. (*Aves and Mammalia*)
- b. Induction in tissue cultures and potencies of cells in tissue culture. (*Aves and Mammalia*)
- c. Development of specific substances during induction and regeneration. (*Amphibia and Aves*)

WOLFF, Mrs Em. Dr ès Sci. — Lab. de Zool. de la Fac. des Sci. et Lab. d'Embryol. et Tératol. expér. du C.N.R.S., Inst. de Zool. et de Biol. gén., 12 Rue de l'Université, STRASBOURG, France

- a. Rôle des hormones dans la différenciation du sexe par les méthodes d'injections d'hormones et des castrations embryonnaires. Détermination des caractères somatiques précoces (syrinx et tubercule génital). *Anas boschas* (*Aves*) (en collaboration avec Et. WOLFF)
- b. Recherches sur la différenciation et les besoins nutritifs en culture *in vitro* de la syrinx et du tubercule génital de l'embryon. *Anas boschas* (*Aves*)
- c. Recherches sur les besoins nutritifs d'organes embryonnaires explantés et cultivés sur milieu synthétique.

WOLFF, Et. C. F.I.I.E., Dr ès Sci., Prof. — Lab. de Zool. de la Fac. des Sci. et Lab. d'Embryol. et Tératol. expér. du C.N.R.S., Inst. de Zool. et de Biol. gén., 12 Rue de l'Université, STRASBOURG, France

- a. Recherches expérimentales sur l'Embryologie et la Tératologie. Monstres simples, monstres doubles et poly-embryonie. (*Aves*)
- b. La différenciation sexuelle, par les méthodes de greffes, de castration, d'injections d'hormones et d'explantations. Différenciation normale et inversion sexuelle des gonades, des voies génitales et des caractères somatiques précoces. *Gallus* et *Anas* (*Aves*) (en collaboration avec Mrs Em. WOLFF, Mrs Y. LUTZ—OSTERTAG, Mrs D. SCHEIB—PFLEGER, Miss B. SALZGEBER, A. HAMPÉ et G. STRUDEL)
- c. Problèmes relatifs à la régénération des Planaires d'eau douce. Origine des cellules de régénération et processus d'induction dans la régénération. *Polyclelis nigra*, *Euplanaria lugubris* (*Turbellaria*) (en collaboration avec Mrs Fr. STEPHAN—DUBOIS et Th. LENDER)
- d. Recherches sur la différenciation *in vitro* des caractères sexuels embryonnaires (gonades, canaux de Müller etc.) et de différents organes. Besoins nutritifs des organes en culture en milieux synthétiques. (*Amniota*) (en collaboration avec Miss K. HAFFEN, Mrs Em. WOLFF etc.)

WOLSKY, A. Dr Phil. (Budapest) — Unesco Science Co-operation Office for South East Asia. Dj. Diponegoro 76, DJAKARTA, Indonesia

- a. Comparative study of the rate of cleavage of marine ova in tropical regions, at normal and abnormal temperatures. Various species (*Echi-noidea*), various species (*Polychaeta*)
- b. The influence of the central nervous system (optic tract) on the development of the compound eye. *Philosamia cynthia* (*Lepidoptera*)

WOODGER, J. H. Prof. — Middlesex Hospital, Med. School, LONDON W. 1, England (U.K.)
(no embryological work in progress)

- WRBA, H. Dr Med. — Inst. für exp. Krebsforschung der Univ. Heidelberg, Vossstrasse 3, HEIDELBERG, Deutschland
- a. Untersuchungen zur Frage der Differenzierung insbesondere des Zentralnervensystems und der Herzanlage *in vivo* und *in vitro*. (*Rodentia*)
- YAMADA, T. D.Sc. (Rigakuhakushi), Prof. — Biol. Inst., Fac. of Sci., Nagoya Univ., Chigusa-Ku, NAGOYA, Japan
- a. Double potential theory of early ontogenesis, its application to the regionality of the organizer action. (*Vertebrata*)
 - b. Regional induction by some fractions of adult tissue tested on the isolated ectoderm. *Triturus pyrrhogaster* (*Urodela*)
- YAMAMOTO, K. Rigakushi (M.S.), Asst Prof. — Akkeshi Marine Biol. Stat., Hokkaido Univ., AKKESHI, Japan (attached to the Sci. Fac. of Hokkaido Univ.) (no data received on Nov. 1st, 1953)
- YAMAMOTO, T. Dr Sc., Prof. — Biol. Inst., Fac. of Sci., Nagoya Univ., Chigusa-Ku, NAGOYA, Japan
- a. On the mechanism of fertilization and activation. *Oryzias latipes* (*Teleostei*)
 - b. Experimental analysis of the development of sexual characters. *Oryzias latipes* (*Teleostei*)
 - c. Experimental sex-reversal in the genetic males. *Oryzias latipes* (*Teleostei*)
 - d. Melanin formation in color phenotypes. *Oryzias latipes* (*Teleostei*) (in collaboration with T. HISHIDA)
- YANAGIMACHI, R. Rigakushi (M.S.) — Zool. Inst., Fac. of Sci., Hokkaido Univ., North 8, West 5, SAPPORO, Japan (no data received on Nov. 1st, 1953)
- YAO, T. Ph.D. — Lab. of Developm. Physiol., Inst. for Exper. Biol., Acad. Sinica, 865 Chang Ning Rd, SHANGHAI, China (no data received over some years)
- YASHIKA, K. — Lab. of Embryol. and Exper. Morphol., Zool. Inst., Dept of Sci., Kyoto Univ., KYOTO, Japan
- a. Hormonal mechanism of metamorphosis. *Bombyx mori*, *Luehdorfia japonica* (*Lepidoptera*) and *Lucilia* (*Diptera*)
- YATES, Miss H. B. B.Sc. (St Andrews) — Inst. of Animal Genet., Univ. Dept of Genet., King's Buildings, West Mains Rd, EDINBURGH 9, Scotland (U.K.)
- a. Use of radioactive isotopes for tracing the movement of labelled substances into and within embryos. (*Amphibia*) (in collaboration with C. H. WADDINGTON and J. DAINTY)
- YNTEMA, C. L. F.I.I.E., Ph.D., Prof. — Dept of Anat., School of Med., State Univ. of New York, SYRACUSE 10, N.Y., U.S.A.
- a. Induction and differentiation of ear ectoderm. *Ambystoma punctatum* (*Urodela*)
 - b. Regeneration of aneural limbs. *Ambystoma punctatum* (*Urodela*)
 - c. Development of autonomic nervous system. *Gallus domesticus* (*Aves*) (in collaboration with W. S. HAMMOND)
 - d. Effect of sulfa drugs on the embryo. *Mus musculus* (*Rodentia*) (in collaboration with W. S. HAMMOND)
 - e. Development of the visceral skeleton. *Gallus domesticus* (*Aves*) (in collaboration with W. S. HAMMOND)

- YOUNG, W. C. Ph.D., Prof. — Dept of Anat., Univ. of Kansas, Med. School, LAWRENCE, Kansas, U.S.A.
- a. Reproduction as influenced by hypothyroidism and hyperthyroidism in both males and females. *Cavia porcellus (Rodentia)*
 - b. Sexual behaviour in the male. *Cavia porcellus (Rodentia)*
- ZAAIJER, Miss J. J. P. Ph.D. — Lab. for Exper. Histol., Fac. of Med., Univ. of Leyden, Wassenaarseweg, Boerhaavekwartier, LEIDEN, Holland
- a. Factors governing dentin formation. *Mus musculus (Rodentia)*
 - b. Rôle of the odontoblasts in the formation of secondary dentin. *Mus musculus (Rodentia)*
 - c. Cartilage and bone formation *in vitro*. *Homo sapiens (Primates)*
- ZACWILICHOWSKA, Miss K. D.Sc. — Zool. Dept of the Jagellonian Univ., St Anne 6, KRAKOW, Poland
(no data received on Nov. 1st, 1953)
- ZAHND, J. P. — Inst. d'Embryol., Fac. de Méd., 1 Place de l'Hôpital, STRASBOURG, France
- a. Développement du squelette. Facteurs influençant le développement. *Anas (Aves)*
- ZENKER, W. J. Dr Med. — Anat. Inst. der Univ. Wien, Währingerstr. 13, WIEN IX, Oesterreich (no embryological work in progress)
- ZEUTHEN, E. Dr Phil. — Lab. of Zoophysiol., Nat. Sci. Fac., Univ. of Copenhagen, Juliane Mariesvej 32, COPENHAGEN Ø, Denmark
- a. Study with Cartesian divers of mitotic rhythm in metabolism during cleavage period. (*Echinodermata* and *Amphibia*)
 - b. Determination of desoxyribonucleic acid in eggs and embryos, evidence of cytoplasmic desoxyribosides. (*Amphibia*) (in collaboration with E. HOFF-JÖRGENSEN)
 - c. Mitotic rhythm in reduced weight (weight below water) during cleavage. *Psammechinus microtuberculatus (Echinoidea)*
- ZUCKERMAN, S. M.A., M.D., D.Sc., M.R.C.S., L.R.C.P., F.R.S., Prof. — Dept of Anat., The Med. School, Birmingham Univ., Edgbaston, BIRMINGHAM 15, England (U.K.)
(no data received on Nov 1st, 1953)
- ZUIDWEG, M. H. J. — Anat.-Embryol. Inst., Municipal Univ. of Amsterdam, Mauritskade 61, AMSTERDAM O, Holland
- a. Quantitative development of different proteins in the embryonic eye-lens. *Gallus domesticus (Aves)*
- ZWEIBAUM, J. Dr, Prof. — Inst. of Histol. and Embryol., Acad. of Med. ul. Chałubińskiego 5, WARSZAWA, Poland
- a. Le comportement de graisses dans le placenta. *Homo (Primates), Mus musculus (Rodentia) (Insecta)*
 - b. Le glycogène, les graisses et les acides nucléiques dans les œufs.
- ZWILLING, E. Ph.D., Assoc. Prof. — Dept of Genet., Coll. of Agric., Univ. of Connecticut, Storrs Agric. Exper. Stat., STORRS, Conn., U.S.A.
- a. Effects of thyroxin on the embryo. *Gallus domesticus (Aves)*
 - b. Analysis of tail development. *Gallus domesticus (Aves)*
 - c. Disaggregation and reaggregation of early embryos. Effects on differentiation. *Gallus domesticus (Aves)*
 - d. Culture behavior of early embryonic tissues. *Gallus domesticus (Aves)*

LIST OF SUBJECTS with Names of Investigators

(arranged according to organ systems and systematic groups)

GENERAL DIVISION

CLASSIFICATION INTO GENERAL RUBRICS

- I Descriptive and comparative embryology
- II Experimental developmental morphology
- III Physiology of development
- IV Development and genetics
- V Development and pathology
- VI Regeneration
- VII Metamorphosis

CLASSIFICATION OF SYSTEMATIC GROUPS AND SPECIAL ORGAN-SYSTEMS (to be used for all rubrics)

Systematical subdivision

EV Evertebrata

- P Protista
- A Porifera
- B Coelenterata
- C Vermes and Onychophora, Tardigrada and Linguatulida
- D Arthropoda
- E Mollusca
- F Bryozoa, Entoprocta, Brachiopoda and Hemichordata
- G Echinodermata
- H Urochordata and Cephalochordata
- V Vertebrata

LV Lower Vertebrates

- I Pisces
- J Amphibia

HV Higher Vertebrates

- K Reptilia
- L Aves
- M Mammalia

Subdivision of special organ systems

- 1 Skin**
 - a general subjects
 - b exo-skeleton
 - c teeth
 - d hair, horns, nails
 - e feathers
 - f sense organs
 - g glands
 - h mammae
 - i pigment cells and patterns
- 2 Nervous system**
 - a general subjects

b central nervous system

- 1 brain
- 2 spinal cord

c accessory organs

- 1 parapophysis
- 2 parietal organ
- 3 pineal body
- 4 hypophysis

d ganglia

- 1 cephalic ganglia
- 2 spinal ganglia

e nerves

- 1 cephalic nerves
- 2 spinal nerves

f para- and sympathetic and intramural nervous system

- 1 para- and sympathetic nervous system
- 2 intramural nervous system

g meninges**3 Special sense organs****a nasal organ****b eye**

- 1 eye
- 2 lens

c ear**d lateral sense organs****4 Skeleton****a general subjects****b embryonic temporary endo-skeleton****c skull****d truncal skeleton****e limbs and wings****f joints****5 Muscular system****a general subjects****b skeletal muscles (head, trunk and tail)****c visceral muscles (head and trunk)****d muscles of limbs and wings****6 Alimentary tract****a general subjects****b mouth- and pharyngeal cavities****c intestinal tract****d proctodaeum****e salivary glands****f liver****g pancreas****7 Respiratory organs****a general subjects****b external gills****c internal gills****d lungs and larynx**

e air-bladder

8 Heart, vascular system and blood

a general subjects

b heart

c/d arterial and venous system

e capillary system

f blood

9 Coelomic cavities and endothelia, lymphatic system and connective tissue

a/b coelomic cavities and endothelia

c lymphatic system

d connective tissue

10 Urogenital system and sex determination

a general subjects

b/c kidney and urinary ducts

d/e/f gonads (ovary and testis), genital tracts and accessory glands

g sex determination

11 Endocrine glands

a general subjects

b hypophysis

c thymus

d thyroid gland

e gonads

f adrenals

g pancreas

I. DESCRIPTIVE AND COMPARATIVE EMBRYOLOGY SUBDIVISION

1 Theoretical problems

2 Methods and technics

3 General subjects (asexual development, etc.)

4 Initial development

a General subjects

b Primordial germ cells

c Gameto-, ovo- and spermatogenesis

d Maturation

e Ovulation and oviposition

f Activation and fertilization

g Parthenogenesis

5 Cleavage and mitosis

a Cleavage

b Mitosis

6 Further development of Invertebrates

(including complete and partial — e.g. early — development)

EV Evertebrata

P Protista

A Porifera

B Coelenterata

C Vermes and Onychophora, Tardigrada and Linguatulida

- a General investigations
 - 1 General subjects
 - 2 Complete development
 - 3 Partial development
 - 4 Implantation and placentation
 - b Early development, gastrulation, etc.
 - 1 Early development
 - 2 Gastrulation and formation of germ layers
 - 3 Development of foetal membranes
 - c Neurulation, etc.
 - 1 Neurulation (s.s.)
 - 2 Development of neural crest
 - 3 First larval development
 - d Development of part of the organism
 - 1 Head
 - 2 Limbs and wings
 - 3 Tail
 - e Development of special organ-systems

General questions and announcements

I The Hubrecht Laboratory

In the year 1954 for the first time an international team work will be held at the Hubrecht Laboratory, in order to stimulate and strengthen international cooperation in a very direct and practical way by a working together for half a year on a general problem of great actuality and by exchanging personal experiences and opinions. Besides the concerted scientific approach to the general problem, the literature around the subject will be discussed critically in order to stimulate the reading of foreign literature and ameliorate the form and accuracy of scientific publication.

As a guarantee of a high scientific level, this team work is only open for postgraduates and exceptionally for very promising advanced students.

The following scientists will participate in this first team work to be held from February 1st till July 31st (in chronological order of application):

- 1) Miss V. M. McMurray (Phil.Dr), Univ. of Iowa, Iowa City, U.S.A.
- 2) D. J. McCallion (Phil.Dr), Acadia Univ., Wolfville, N.S., Canada
- 3) T. W. Glenister (Med.Dr), Charing Cross Hosp., Univ. of London, England
- 4) M. Sala S.J. (Phil.Dr), Zool. Inst., Padova, Italy
- 5) R. Hori (M.Sc.), Biol. Inst., Toyama Univ., Japan
- 6) O. Hassa (Dr Vet.M.), Vet. Fac., Inst. Histol. & Embryol., Univ. of Ankara, Turkey
- 7) Miss D. Harari (M.Sc.), Dept of Zool., Hebrew Univ., Jerusalem, Israel
- 8) K. Hara (M.Sc.), Biol. Inst., Nagoya Univ., Japan
- 9) Miss M. Th. C. van Egmond (M.Sc.), Zool. Inst., Univ. of Utrecht, Netherlands
- 10) Miss A. G. Johnen (Phil.Dr), Zool. Inst., Univ. of Cologne, Germany

II The Central Embryological Library (C.E.L.)

A Exchange of reprints; mailing list; etc.

We want to thank those colleagues who sent us reprints and request them to continue to do so. A more or less complete collection of reprints as part of the C.E.L. may be of great use both to guest workers at the Hubrecht Laboratory and to investigators abroad, for borrowing reprints and for information about literature. This aim can only be attained by receiving reprints from as many investigators as possible.

The Hubrecht Laboratory in its turn is distributing considerable numbers of reprints of its publications, but this distribution is of course bound to certain limits. Therefore only institutes and scientific teams can be placed on our mailing list. An exchange with individual investigators cannot unfortunately be upheld.

As mentioned in previous issues all reprints are classified upon receipt according to a subject-classification-system which corresponds to that used in the G.E.I.S. This makes our collection of reprints particularly well accessible.

May we remind you of our request to place in the C.E.L. those private collections of books and reprints which are not in use any more? In this way these collections become again accessible, just as is the case with material

donated to the Central Embryological Collection of slides and material of the Hubrecht Laboratory.

B Services rendered by the C.E.L.: conditions for borrowing

1. Every embryologist can ask for information about literature of certain authors, for surveys of literature on certain subjects (according to the classification-system of the G.E.I.S.), for surveys of newly published literature, etc.
2. Every embryologist can borrow reprints which are not available in his own country. Books and Normal tables are usually not lent out, volumes of periodicals are only lent out to investigators in the Netherlands.

Conditions:

- a. Reprints may be borrowed for 3 months at the utmost (for the Netherlands 1 month), time for shipment not included.
- b. The receipt added to the consignment must be returned by return of post, after having been controlled and signed.
- c. In case of high forwarding charges these have to be partly carried by the applicant.
3. Every embryologist can personally consult the C.E.L. at all times.
4. The C.E.L. will be at the disposal of every embryologist working at the Hubrecht Laboratory.

III The Central Embryological Collection of slides and material

A The Collection; Concise Catalogue; etc.

In the course of the last three years the collection has been entirely reorganized. The material has been arranged systematically and as much as possible according to the stageings of existing Normal Tables.

In the beginning of 1954 a Concise Catalogue of the collection will be published and distributed among all embryological institutes. This publication contains also a bibliography of Normal Tables and similar publications.

We trust that the accessibility of the collection has improved very much by the reorganization and will still be improved by the establishment of a detailed card index to be completed in the course of 1954. Until now few workers were aware of the extensive and often extremely rare embryological material which the collection contains.

B Conditions for borrowing

Conditions:

1. Slides, material in paraffin and/or material in alcohol can only be borrowed for one year, after which it has to be returned automatically in case no special request for extension of the loan has been made by the investigator and has been approved by the staff of the Hubrecht Laboratory.
2. Material in alcohol or paraffin has to be returned as such or in the form of well prepared slides which have been sectioned, stained and embedded properly, clearly labeled (name of species, thickness

and direction of sectioning, method of staining, etc.) and numbered according to given indications.

3. Costs of transport may be charged in case these surpass reasonable limits.
4. Two copies of those publications dealing with material from the Central Embryological Collection should be sent to the Central Embryological Library of the Hubrecht Laboratory.
5. In case material of the Central Embryological Collection has been used in investigations, it is respectfully requested that this be indicated in the publications concerned.

Restrictions:

6. Very rare or regularly consulted material can only be studied at the Hubrecht Laboratory.
7. Material belonging to the historical collection cannot be lent out.
8. In case material has not been treated properly or (after special request) has not been returned in time by an investigator, material will no longer be lent out to him or her.

IV The Photographic Reproduction Service

The Hubrecht Laboratory is willing to make photographic reproductions of any papers which are present in the Central Embryological Library or can be borrowed from elsewhere. These reproductions will be either positive transparent microfilm prints (for use in a microfilm reading apparatus) or enlarged ordinary prints. The negatives will remain at the Hubrecht Laboratory.

We have been experimenting to find the most suitable materials and the best methods for reproduction. The result is the following price-list (prices per page, both text and plates):

positive film prints:	fl. 0.25 = \$ 0.07
7 × 10 cm. (box-camera size):	fl. 0.40 = \$ 0.10
13 × 18 cm. (ordinary page size):	fl. 0.50 = \$ 0.13
18 × 24 cm. (large page size):	fl. 0.65 = \$ 0.17

V The Normal Table of *Xenopus laevis*

Dr D. R. Newth (London) has undertaken the description of the development of muscles and skeleton of the pelvic girdle and hind limbs. Miss M. T. C. van Egmond (Utrecht) will study the development of the ear. Dr Bretscher (Bern) and Dr van de Kamer (Utrecht) have withdrawn from the project.

The present situation of the project is as follows:

We received the contributions of Dr Newth (London), Dr Smit (Stellenbosch), Dr Ryke (Potchefstroom), Prof. Raven (Utrecht), Dr Kollros (Iowa City) and Dr Nieuwkoop (Utrecht).

The contributions of Dr Millard (Cape Town), Prof. Ariëns Kappers (Groningen) and Dr Bijtel (Groningen) are nearly completed.

The subjects of the other collaborators are still in preparation; most of them make satisfactory progress.

Communications of the „Institut International d'Embryologie” (Embryological Section of the I.U.B.S.)

In response to a wish expressed at the last meeting of the I.I.E., in Italy a national Embryological Group has been formed for the promotion of cooperation between the Italian workers in the field of embryology, both animal and vegetal. To this end, the Group will hold periodical meetings for the exchange of views and informations, and the discussion of researches in progress. Its first meeting was held in Bologna, March 30—31, 1953. After a business session, a number of informal communications were presented. It was decided that a second meeting shall be held in the autumn of 1953 in Naples. Prof. Pasquini, Bologna, is the Secretary of the Italian Embryological Group.

The Proceedings of the Symposium held at Utrecht on August 27th—29th, 1952 (*The biochemical and structural basis of morphogenesis*), will appear before the end of 1953.

Persons interested should apply to "Archives Néerlandaises de Zoologie", c.o. the Librarian, Zoological Station, den Helder, Netherlands.

„LA RÉGÉNÉRATION ET LES PROBLÈMES DE LA
MORPHOGENÈSE”
1932

by M. Abelos
253 pp. with 57 figs in text

„Collection des actualités biologiques”
Gauthiers-Villars
Paris

This book, which was already published in 1932 without the appearance of a new edition, cannot, of course, be called up to date, but gives nevertheless a rather comprehensive survey of the phenomenon of regeneration in the animal kingdom and in plants. Although the theoretical aspects are extensively discussed, their classification is not always well defined; e.g. no clear distinction has been made between the processes of regulation in early development and the actual process of regeneration, processes which besides many similarities, differ from each other in several respects.

The subject has been treated chronologically, so that first the onset of regeneration and the formation of a regeneration blastema is discussed and then the aspects of growth and differentiation, the origin of polarity and its role in the process of regeneration, the segregation of the regeneration blastema and the anomalies in regeneration. At the end of each chapter rich bibliographical data are given.

It is our impression that in general the theoretical aspects had the main interest of the author, so that the facts form more or less material for illustration of certain points of view. The text has been more strongly subdivided than would have been necessary when the subject would have been approached primarily from the analytical side and the theoretical discussion would have been placed at the end of the book.

Notwithstanding the special form of approach, this book can still be recommended as an interesting guide into the wide field of regeneration and morphogenesis in general.

„EMBRYOLOGY”
1949

by L. G. Barth
330 pp. with 194 figs

The Dryden Press
New York
price: \$ 5.50

The author emphasizes the role of developmental processes in the entire life of the animal, so that a general knowledge of these processes is important for the premedical student, the college student or the biological student.

The various chapters have been mainly arranged chronologically; the first ones are therefore dealing with the oviposition, the structure of the unfertilized egg, the process of fertilization, cleavage, gastrulation and neurulation after which the later development has been treated according to organ systems. Special chapters have been inserted on the problem of field action, interrelationships of developing structures, regeneration, growth and its relation to hormones, and the problem of sex differentiation, while some special chapters have been devoted to the development of the frog egg, the development of the chick embryo and to mammalian development.

Each chapter has been treated very clearly and conveniently, and has been illustrated by simple but very instructive diagrams. The principle results of descriptive and experimental analysis and the existing theories have been properly discussed in each chapter.

The text has been very clearly written and is very concise and accurate, so that it is a pleasure to read this textbook, which has moreover been illustrated with very well reproduced photographs. It is a pity that some of the pictures of the development of the chick blastoderm and the mammalian embryo are too strongly reduced in size so that they are not so easily surveyable as the majority of the figures, while also some of the diagrams are somewhat too strongly schematized, which might interfere with a recognition of the natural relationships and topography. The chapter of suggested readings gives an extensive list of other textbooks to be referred to on each subject.

We will highly recommend this textbook for teaching purposes and as a source for an introduction into the field of embryology for the embryology student.

„MORPHOGENESIS, AN ESSAY ON DEVELOPMENT”
1952

by J. T. Bonner
296 pp. with 90 figs and 9 plates

Princeton University Press
Princeton, N.J.
price: \$ 5.—

The complexity of the living organism and the enormous variety in forms induces us to search after the main principles on which the organisation of

living material must be based. The author tries to show in this essay on development how at least three principles seem to play a role in the structural organization of living matter, viz. growth, morphogenetic movement and differentiation. External and internal limiting factors influence the individual roles of these processes in the development of structural patterns. Polarity and its determination also directs the achievement of structural pattern formation. This takes place inside a single cell as well as in cell aggregates, multicellular organisms and even in colonies of individuals. A comparison with the properties of crystals forms an interesting analogy as a possible bridge between the biological and the physico-chemical appreciation of the problems of life, which might lead according to the author to a "micro-structure theory". The text has been enriched with carefully selected, excellent illustrations, so that it is a pleasure to read this interesting essay. The bibliography includes unfortunately only a few references in foreign languages, which gives the wrong impression as if this approach of the problem of life is mainly made in the anglo-american part of the world.

"CYTOCHEMISTRY"
(A Critical Approach)
1953

by J. F. Danielli
139 pp. with 8 figs in text
and 12 photo-plates

John Wiley & Sons, Inc., New York
Chapman & Hall, Ltd., London
price: \$ 4.—

This book will by no means be called a textbook on cytochemistry, since according to the author "the body of agreed facts on cytochemistry is still completely insufficient"; it only represents a slightly enlarged version of a series of lectures given in 1949 at the University of Chicago.

In the introduction of this book the elementary techniques are treated critically in order to show their applicability and their restricted value. In the following chapters some special cytochemical problems and the techniques used in their analysis are discussed more in extenso, while at the end a future outlook in cytochemistry is given.

The author's critical approach to this young branch of biology might have great influence on its further growth, since it shows how great difficulties have to be overcome before reliable results can be obtained. We, nevertheless, think that the often still highly speculative working-hypotheses put forward in this book, do not always actually contribute to its general high standard.

For the field of embryology where the biochemical studies have been up till now so unsuccessful by the undifferentiated character and the small size of the material concerned, cytochemistry might offer new and very important methods of analysis. Here it will, however, be a first condition in the analysis to proceed very critically step by step in order to prevent serious disappointments, and to avoid a further discredit of the field of embryology among the present and future young generations of scientists; put in the words of the author "the promise of the field of cytochemistry, however, will only be fulfilled if cytochemistry is used as a rigorous technique by an adequately trained staff".

We appreciate it very much that this first critical approach has been made, and warmly recommend this book to all embryologists.

Lillie's „DEVELOPMENT OF THE CHICK“
 (An introduction to Embryology)
 1952

Revised by H. L. Hamilton
 624 pp. with 283 figs

Henry Holt and Co.
 New York
 price: \$ 8.50

After a short introduction in which some general biological theories are followed historically, the structure of the male and female germ cell is described.

The first part of the book deals with the early development till the end of the third day at which all organ systems have been laid down in their primitive form. The development of the egg in the ovary and its transport through tuba and uterus, the maturation and fertilization, the period of cleavage and the formation of a double-layered blastoderm till the stage at which the egg is normally laid, are discussed in extenso and illustrated with clear and original figures. Then the external development is pictured on the basis of the normal table of the chick, made by Hamburger and Hamilton, which has been fully reproduced in this textbook. This forms a very worthful extension of this new edition. The development of the primitive streak is described extensively on the basis of the most recent investigations, as well as the topography of the presumptive organ rudiments at the definitive primitive streak stage. The description of the development of the embryo during the formation of the somites and the outgrowth of amnion and allantois is illustrated with excellent pictures. Special attention is paid to the development of the nervous system and the sense organs, the alimentary tract and the various mesodermal structures.

After the third day the further development is treated according to organ systems; after the development of the external form and the embryonic membranes have been followed step by step all organs pass in review. The blood circulation is already briefly discussed in this chapter, but the colour plates, how attractive as pictured, only partly fulfil their purpose; the colours, red and blue, used respectively for the arterial and venous system, may be confusing since it is not clearly indicated that they do not coincide with the physiological condition of the blood for which they are normally also used.

The development of the nervous system is discussed in detail. It would be advisable to mention the staining techniques used in the reproduced histological preparations. This would show the less experienced students that these structures have to be made visible with a special technique.

The discussion of the various organ systems is done just as thoroughly as the description of the early development and offers a great richness of data illustrated with carefully selected or original figures, all of which are richly and clearly labelled.

This textbook which gives such a detailed and wide picture of the development of the chick, will be received with great sympathy by all embryologists, and offers a rich material for study to the beginning as well as to the more

advanced student while the experienced investigator may also frequently use it in order to verify certain facts or to compare special topographical and temporal relations. It would therefore be advisable to mention the literature references in the text with year of publication in order to facilitate a reading of the original literature. The list of references of the various chapters could then be combined, so that repetitions would be avoided.

The small deficiencies are only mentioned as possible suggestions for improvements of this in so many respects excellent textbook, with which we like to congratulate the author and also ourselves very cordially.

..AN OUTLINE OF GENERAL PHYSIOLOGY"

Third Edition, 1952

by L. V. Heilbrunn
818 p.p. with 123 figs

W. B. Saunders Co.
Philadelphia-London
price: \$ 10.50

It is pleasure to review this third edition, since the second edition, published in 1943, was gradually very much out of date by the rapid growth of this very extensive field of science. The author has put himself to a heavy task by bringing this new edition up to date. An enormous amount of literature had to be incorporated in the text, new problems had to be put forward. We must confess that we have great admiration for the form in which this enormous literature (4300 references) has been brought together in this textbook. The author nearly always succeeded in giving the main facts in a very concise form against the background of the fundamental problems of life and living material. The literature in foreign languages is richly represented. The references at the bottom of the pages may actually induce the students to read the original literature, so that this textbook may have also a high didactic value.

The subdivision of the extensive text, the simple and clear form of writing and the well chosen illustrations make this textbook to one of the most valuable sources of information and guides in this extensive field, so that we warmly recommend this excellent textbook, which the author so characteristically called an outline of general physiology, to all students in biology and medicine. We find that this book might not be lacking in any good laboratory library.

..THE PRENATAL ORIGIN OF BEHAVIOR"

1952

by D. Hooker
143 pp. with 6 figs and 4 tabs

Porter Lectures, Series 18
Univ. of Kansas Press
Lawrence (Kan.)
price: \$ 2.50

This book presents the subject matter treated by the author during his Porter Lectureship at the Kansas School of Medicine.

As an introduction, in Chapter I the author gives a "necessarily rather superficial review", as he himself states on page 6, of the development of

behaviour in fishes, amphibians, reptiles, birds and infrahuman mammals. However inexhaustive, this chapter is exceedingly readable and stimulating owing to the clear and at the same time critical account of the work of the various authors, as well as to the attention paid to theoretical backgrounds.

The main portion of the book is formed by a survey of the methods and results of the extensive and interesting researches carried out on human fetuses by the author and his co-workers at the Pittsburg School of Medicine, from 1932 onwards.

Whereas the first part of the book deals only with what the author calls "overt" (externally visible) behaviour, in Chapter III some interesting considerations are given to the relations of behaviour with the internal (morphological and physiological) organization of the mammalian embryo and fetus. The principal points dealt with on the basis of a discussion of recent researches in this field, are the following: Morphological development and function of embryonic muscle; Development of reflex pathways; Types of initial reflexes (with a discussion of Sherrington's concept of the "simple reflex" and a critical discussion of the concepts of Windle and his associates); Effects of anoxia and asphyxia; Intra-uterine respiration; Function of kidneys, alimentary tract and endocrine organs.

A fundamental question playing a role in the entire book is the controversy between the "Coghillian" concept of the development of behaviour (the "total pattern" idea) and the "Windelian" viewpoint (the idea of "successive addition of simple reflexes"), which has in particular been applied to mammals. The author appears to be inclined towards the Coghillian line of thought, even in the case of mammals, where he bases himself largely on his own researches on the human fetus.

The book contains a reference list presenting the most important older and recent literature, an index of names, and a very useful subject index.

„PROBLEMS OF MORPHOGENESIS IN CILIATES“
(The kinetosomes in development, reproduction and evolution)
1950

by A. Lwoff
103 pp. with 32 figs

Volume of the Wiley Biol. Research series
John Wiley & Sons Inc., New York
Chapman & Hall, Ltd, London
price: \$ 3.50

The author directs our attention on a very fascinating problem of life, the problem of self-reproduction, so well known for chromosomes and their constituents. This property of self-reproduction is however not restricted to the nucleus but also exists in the protoplasm, viz. e.g. in the so called kinetosomes, so characteristic for Ciliates and other organisms. The kinetosomes do not form an irreversibly differentiated system, but can dedifferentiate into a plastic, self-reproducible system which is genetically controlled. One of their most interesting properties is their polyvalency. They can form cilia, flagellum, fibers, trichocysts, etc. These structures are rigid formations, but they can undergo dedifferentiation.

In terms of Weiss' concept of "molecular ecology" the author tries to substantiate this purely theoretical concept in the properties and behaviour

of these visible elements among Darlington's so called "undefined residues of heredity".

This monograph which does not pretend to be a treatise or to give an exhaustive survey of the literature, is very clearly written and illustrated with very suggestive figures and highly worth to be read by biologists in general.

"REGENERATION AND WOUND-HEALING"

1952

by A. E. Needham
152 pp. with 5 figs and 3 tabs

Methuen & Co Ltd
London
price: 8s. 6d

This small size book, forming one number in the series of monographs on biological subjects will only give a short illustrative introduction to this very extensive field of science which fascinated man already for many centuries. It will moreover form a key to the rich literature on this subject and will give a survey of the recent advances in its various aspects.

After a short sketch of the normal sequence of events in regeneration, much attention has been paid to the metabolic events during regeneration and to the causal analysis of regeneration, two aspects on which many advances have been made during the last decades.

After some smaller chapters on the rate of regeneration and on morphallaxis and related types of regeneration, finally the distribution of powers of regeneration in the animal kingdom has been briefly reviewed and its many-sided significance has been extensively discussed. The clearly written text and the very rich bibliographical data — there are more than 650 references quoted — makes this book to a very practical and convenient guide into the field of regeneration not only for school teachers but just as well for scientists. A larger number of illustrations would have undoubtedly improved the readability of the text, but would of course also have advanced the price of this booklet.

"TEXTBOOK OF HISTOLOGY"

Second Edition, 1953

by J. F. Nonidez and W. F. Windle
528 pp. with 326 illustrations, composed
of 214 drawings and diagrams and
233 photomicrographs

McGraw-Hill Book Co., Inc.
New York-Toronto-London
price: \$ 9.50

The author states in his preface that this textbook is for the beginner, so that it is not intended for a reference book since many details are intentionally lacking. This concise textbook which covers the histology and microscopic anatomy of the mammalian body, including man, is successfully used at the medical school in Philadelphia where medical education is, however, emphatically based upon direct contact with demonstration material in form of microscopic specimens and motion pictures. Much attention has, therefore, been paid in this textbook to the illustrations. These form indeed one of the most valuable aspects of this in several respects very elementary book.

The value of this textbook can only be determined in its planned educational system together with the special system of lecturing and particularly in combination with the extensive use of demonstration material and motion pictures, of which latter a rather extensive list has been added.

Short lists of references have been added at the end of each chapter; each reference with a brief review, which actually helps the student to find his way to the more detailed and extensive sources of information. A general shortcoming of this textbook is its rather static character; the dynamic aspects of histology and microscopical anatomy, in the form of e.g. the cyclic changes and the processes of transformation during normal growth and during regeneration have been insufficiently focussed.

„ENTWICKLUNGSPHYSIOLOGIE DER INSEKTEN“
1952

by O. Pflugfelder
332 pp. with 126 figs

Probleme der Biologie, Band 5
Geest & Portig K.-G.
Leipzig

This is the first attempt to give a survey of the entire field of insect development only with a more summary treatment of the action of external factors and the general physiology of the developing insect.

According to the author a rather extensive treatment of the morphogenetic processes is necessary for the right appreciation of the physiological aspects of development. The third chapter treats the organogenesis during embryogenesis have been brought together in one textbook.

The subject has been treated chronologically starting with the primitive development. The morphological aspects are discussed first, after which the physiological problems are given according to the regulative, the partly regulative and partly determinative, and the pronounced determinative types of development. The third chapter treats the organogenesis during embryological and post-embryological stages, while the last chapter of this book is devoted to the extensive field of hormonal actions during post-embryonic life.

We feel that this attempt to bring together the morphological and physiological aspects of development is of very great importance in order to bridge the gap between these often separated fields of research, in order to understand that form and function are a unity which cannot be split into separate parts.

The concise text of this book which is so clearly written, has been illustrated with a large number of clear figures, which makes it even more easily readable.

The very rich bibliography forms an excellent guide in this very extensive literature, so that we can highly recommend this textbook to advanced students. It moreover forms an excellent source for literature for embryologists interested in problems of morphogenesis and developmental physiology of insects.

We, therefore, hope that this german textbook might also find its way in many countries of other continents.

price: D.M. 2.40

The author gives a general survey of the causal analysis of the animal development in a very concise form, and synthesizes the facts obtained in the various groups of the animal kingdom to more general concepts.

Mostly, classical experiments are taken as examples, the most recent development not always including. The discussion is mainly restricted to the more principal facts, omitting the finer details and controversies, so that this pocket book actually forms only an introduction into the field of experimental embryology. As such it is very successful and very useful for students interested in this field of science; the more since it has been very clearly written, and since these editions are very cheap, so that they are within the means of every student.

A fortunate idea forms the concise chapter : explanation of terms and concepts. The replacement of the normal list of references by a very short list of handbooks and review articles as keys to the literature has the disadvantage that students are not directly stimulated to read the original literature. It might have been better when the systematical register would have been replaced by an extensive list of references.

„THE FROG, ITS REPRODUCTION AND DEVELOPMENT“
1951

by R. Rugh

336 pp. with circa 167 figs

The Blackiston Cy. Inc.

New York

price: \$ 4.25

In the preface the author clearly justifies the appearance of an extensive study on the normal development of a single form as an indispensable base for an experimental approach in embryology. The american Leopard frog, *Rana pipiens*, has been chosen since so much work in experimental embryology, physiology, cytology and genetics has and can be done on this laboratory animal.

After a brief historical survey of the development of the field of science called embryology, some basic theories in embryology are discussed.

The development of the male and female germ cells, their maturation and subsequent fertilization are extensively described and illustrated with many figures and photographs. Then blastulation and gastrulation are extensively treated, including many data on vital staining etc., after which neurulation and early organogeny are discussed from a large number of diagrams and figures. In the same style the major developmental changes in the early embryo and larva are described.

The second part of the book deals with the development of the individual

organ systems as derivatives of special germ layers so that the attention of the reader is focussed on the development of each organ system.

The large number of illustrations markedly facilitates the reading of the text which is moreover written in a semi-popular form so that this book is of great value for teaching purposes. For the embryology student it moreover gives many valuable data on each successive phase of development so that we can recommend this book to a wide circle of readers.

The extensive glossary of embryological terms at the end of the book forms a very valuable chapter and may serve as an example for other textbooks. The fairly extensive bibliography for frog embryology finally facilitates and stimulates the reading of the original literature.

It is a pity that some of the diagrams, e.g. in the chapter on early organogeny, are too strongly simplified, which may lead to confusion at certain points. It might moreover be preferable to number the figures so that one can refer more easily to them in other parts of the text. These remarks, however, form only a suggestion for improvement of a new edition. This textbook as a total forms a very valuable unit in the series of monographs on development of individual forms such as Lillie's Development of the chick, etc.

„ENTWICKLUNGSPHYSIOLOGIE“
1952

by L. v. Ubisch
85 pp. with 127 figs

F. W. Peters
Berlin

This small monograph only forms an introduction into the field of developmental physiology and gives only some principle facts and problems against the background of the authors vision on development given in the later chapters of this booklet. A number of characteristic forms is chosen among invertebrates and vertebrates, forms on which the problem of "determinative" and "undeterminative" development is illustrated, after which the classical concepts of determination, organization and induction are discussed. After a discussion of Child's gradient-theory and the rôle of special cell-constituents, the author emphasizes the significance of the colloidal state of the so called "ground-plasm". This ground-plasm should be under the influence of three gradient systems along the three axes of the embryo. The genes operate in this three-dimensional gradient-system of the plasm colloids and activate the development of special organ-systems in a mutual harmonic topography and proportion.

Although the train of thought of the author is quite interesting, the hypothesis to which it leads is very general and rather simplistic. Too few basic facts are, however, known than that general theories might bring us much further to an understanding of the basic principles of life.

„ELEMENTS OF CHORDATE ANATOMY“
1953

by Ch. K. Weichert
451 pp. with 256 figs in text

McGraw-Hill Book Comp., Inc.
New York-Toronto-London
price: \$ 5.50

This text book is a condensation of "Anatomy of the Chordates" by the

same author, published in 1951 and has especially been designed to serve as a text in one-semester courses for premedical students. This book will only offer the elementary principles of vertebrate anatomy. A companion volume entitled "Representative Chordates" has been prepared for use in the practical one-semester courses.

The discussion and characterization of the successive systematical groups of the phylum chordates which is lacking in the majority of textbooks on comparative anatomy forms a great advantage of this book. Besides the many other good aspects, such as the clearly written and consistently subdivided text and the many easily surveyable, well labelled figures which illustrate the text very conveniently, we feel that many comparative anatomical problems should be markedly elucidated when more attention should have been paid to the development of the various organ systems. This is particularly striking for the chapters on the reproductive system where the bisexual character of its anlage has not been focussed, the heart, the internal ear and other organ systems. The total lack of references does not stimulate the students to supplemental reading.
